1. CAG Administrator's Message

Dear Friends,

The new COVID 19 reality has given us pause to reflect on the relationship between our complex environment and the health and well being of our communities.

LINKS: Science has found that there are undeniable links between pollution, rampant global development, destruction of earth's ecosystems, climate change, poverty and our health. Everything is connected.

POOR: Pandemics like COVID 19 reminded us that because the poor are deprived of adequate health care and healthy food and are often exposed to toxic pollution, they suffer disproportionately from the diseases. Urban planning decisions often expose them to poisoned air, soil and water.

EXPENDABLE: The lives of the poor can seem expendable even after science has shown that pollution, even at very low levels, can cause sickness and early death.

OUR NEIGHBORS: Many of the residents who live in the VB/I-70 Superfund Site are low income, minorities.

CAG: The VB/I70 CAG, is a group of dedicated, volunteer, Denver residents along with their excellent volunteer technical experts and Advisory Board members.

CAG ROLE: Together we are making every effort to learn about the environmental and health hazards that exist, even today, in the VB/ I-70 Superfund Site. The CAG is charged by Congress to work along side of USEPA and other agencies and to advise them as work progresses to clean up the environment in this low income minority community.

EJ SITE: EPA has even designated the community

as an Environmental Justice Site.

EMPOWERMENT: The CAG is also charged with informing the community about what we learn to help empower you to have an impact on life altering decisions that are often made by others on your behalf.

"No one is safe until everybody is safe."

We thank you for your interest and support. If you would like to be a part of the work of the CAG, no matter how small, we have a place for you.

2. Will Supreme Court Decision on the Clean Water Act Impact the VB/I-70 Superfund Site?

Mr. John Putnam, CDPHE (click on image for background)

The CAG recently sent a letter** to Mr. John Putnam,
Director of Environmental Programs at the Colorado
Department of Public Health and Environment:

Dear Mr. Putnam:

*The Vasquez/I70 Superfund Community Advisory
Group has recently been made aware of the April 23,
2020, decision of the U.S. Supreme Court in*

County of Maui, Hawaii v. Hawaii Wildlife Fund, et al.

https://www.supremecourt.gov/opinions/19pdf/18-260_5i36.pdf

<https://www.scotusblog.com/case-files/cases/county-of-maui-hawaii-v-hawaii-wildlife-fund/>

*We would like to request that CDPHE, as the designated
authority in Colorado for enforcement of the Clean*

*Water Act, present written and oral comments to the (virtual)
May 19, 2020 Community Advisory Group meeting
regarding the implications of the Hawaii decision.*

*We would appreciate CDPHE's comments regarding
the decision in general, and in particular with respect to the
groundwater plume discharges to the South Platte
River from VB/I-70 OU3 (cadmium plume) and VB/I-70 OU2
(the plume from Denver's mid-20th century landfill).*

*****CDPHE replied that they were too busy to attend but
would reply in writing within a couple of weeks.***

See CAG Technical Advisor Chuck Norris' Memo to CAG :
GLOP & discharge of leachate from OU2 into Waters of the United States

3. CAG Resolution to EPA

Click link to read full Resolution:

CAG Resolution 2020-1

The CAG has often been challenged by EPA, CDPHE and Denver's, reluctance to share pertinent information with them and/or their technical experts and to provide support and services offered other CAGs in Colorado.

The requested information is needed for the CAG to fully discharge its responsibilities per their Congressional mandate and the EPA Guidelines for Community Advisory Groups. This legitimate CAG has many unanswered questions and unfulfilled requests for documents and other information.

BE IT HEREBY RESOLVED:***

1. That EPA Region 8 immediately bring the Community Advisory Group up to date on EPA communications, documents and discussions with the Potentially Responsible Party or Parties (PRP) regarding plans and work on the Remedial Investigation (RI) and Feasibility Study for

Operable Unit 2; and

2. That EPA release to the Community Advisory Group an up-to-date list of all documents and studies, along with a link to each document/study or a PDF of same, being reviewed and/or relied upon to arrive at a description of OU2 and a new remedial investigation for OU2; and,

3. That EPA also release to the Community Advisory Group all documents and communications pertaining to the cadmium plume that has been identified in OU3; and,

4. That, going forward, the EPA, CDPHE, DDPHE and CCD facilitate the inclusion of CAG technical advisors Chuck Norris and Adrian Brown in meetings, communications and documents pertaining to planning and work at the Site; and,

5. That the Community Advisory Group will, consistent with its obligations under the CAG's By-Laws, write to EPA Region 8 advising EPA of its obligations to respond to the CAG formally, in the manner consistent

with Superfund regulations pertaining to
Community Advisory Group recommendations and advice.

Approved via email by members of the Community
Advisory Group May 13, 2020.

*** To date, the EPA has chosen not to respond to the CAG.

4. CAG AGENDA Virtual Meeting

May 26, 2020, 5:30- 7:30 PM

Introductions/ Sign In

1. Agency Presentations /Updates

EPA: OU2 & OU3 (Leachate /Cadmium Plume)
